

**National Genetics Reference Laboratory (Wessex)**

**Meeting announcement:  
New and Developing Technologies for  
Genetics Diagnostics**

**5th and 6th July 2010  
Salisbury, UK**

This meeting will cover a wide range of techniques and issues relevant to genetic diagnostics in the 21<sup>st</sup> century. It is aimed primarily at the UK NHS genetic diagnostic community and will be of interest to established scientists, trainees and technical staff.

The meeting will focus on new sequencing technologies, arrays, acquired abnormalities in cancer and epigenetics. Confirmed speakers include Hans Scheffer, Johan den Dunnen, Mats Nilsson, Joris Vermeesch, Susan Gross, Peter Campbell, Patrick Tarpey, Nigel Carter, Graham Taylor.

The registration fee is £30 for NHS/academic staff and £150 for others. The full programme plus details of registration, accommodation and directions to Salisbury are available at [www.ngrl.org.uk/Wessex/](http://www.ngrl.org.uk/Wessex/) Since numbers are limited, early registration is recommended.

CPD credits will be applied for
